

HOTEL Ready

AI-powered guest roleplay that turns hotel staff into confident, consistent service professionals — before they ever face a real guest.

Presented by Hotel Consult · Support and Advice

THE CHALLENGE

Great service is trained — but training rarely keeps up

High turnover, constant onboarding

Every new hire starts from zero. Front-line roles churn fastest, so you are always training someone.

Practice happens on live guests

Staff learn the hard conversations — complaints, upgrades, upset guests — in front of paying customers.

Inconsistent guest experience

Quality swings shift to shift and property to property. One bad interaction shows up in your reviews.

Training is hard to measure

Classroom sessions and shadowing leave managers guessing who is actually ready for the floor.

THE SOLUTION

A safe place to practise every guest conversation

HOTEL Ready drops your team into realistic, AI-driven guest scenarios. Staff speak, the AI guest responds in a real voice, and every answer is scored with instant coaching — so people arrive on shift already rehearsed.

Realistic AI guests

Powered by Claude — they improvise like real people.

Real spoken voices

Lifelike text-to-speech makes every drill feel live.

Scored & coached

Instant feedback turns each attempt into progress.

36

ready-to-use scenarios

9 per department, across your core guest-facing teams

Support and Advice

HOW IT WORKS

One session, four steps — minutes, not classrooms

1

Pick a scenario

Staff choose a drill for their department and difficulty level.

2

Meet the AI guest

Claude plays the guest and speaks aloud; staff respond naturally.

3

Get scored instantly

Every reply is rated with specific, actionable coaching tips.

4

Replay & improve

Sessions are recorded; staff retry to beat their best score.

Powered by Anthropic's Claude and ElevenLabs voice — sub-2-second responses keep every drill feeling real.

WHAT STAFF GET

A complete training experience, built for the floor

AI guest roleplay

Claude improvises realistic guests — angry, confused, VIP — so no two sessions feel scripted.

Lifelike voice

Three natural ElevenLabs voices read the guest aloud, building real listening and response skills.

Automated scoring

Each answer is rated for empathy, accuracy and resolution, with coaching tips attached.

Record & playback

Sessions are captured so staff and managers can review exactly what was said.

Best-score tracking

Staff see their personal best per scenario and keep pushing to beat it.

36 scenarios

Nine drills per department cover the conversations your guest-facing teams have every day.

FOR MANAGERS & OWNERS

Finally, see who's actually ready

Manager dashboard

- Register and manage your staff in minutes
- Track progress and best scores per person
- Filter performance by department
- Generate and export team reports
- PIN-protected, manager-only access

Admin & organisation

- Manage multiple properties and locations
- Assign roles: staff, manager, admin
- Organisation-wide analytics at a glance
- Full audit logging of critical actions
- PIN expiry and 2FA-ready controls

WHY HOTELS CHOOSE IT

Better service, less risk, measurable results

Mistakes happen in practice

Staff rehearse complaints and tough guests safely — not on your paying customers.

Consistent guest experience

Everyone trains on the same standard, so service holds up across shifts and properties.

Faster, cheaper onboarding

New hires get floor-ready in self-serve sessions instead of costly shadowing time.

Proof, not guesswork

Scores and analytics show managers exactly who's ready and who needs another rep.

Scales with you

From a single boutique to a multi-property group, built on multi-tenant architecture.

Staff who feel supported

Confidence built before the floor means happier teams and lower turnover.

BUILT TO BE TRUSTED

Enterprise-grade security & compliance

Encrypted end to end

HTTPS / TLS 1.3 in transit and encryption at rest on every record.

Data isolation

Row-level security and per-organisation separation keep each hotel's data its own.

Full audit logging

Every critical action is logged for accountability and review.

Compliance-ready

GDPR & CCPA ready, SOC 2 / ISO 27001 certified infrastructure, WCAG 2.1 AA.

99.9% uptime SLA **<500ms** API response **1,000+** concurrent users

UNDER THE HOOD

Built on technology you already trust

Anthropic Claude

3.5 Sonnet powers lifelike guest roleplay and nuanced scoring.

ElevenLabs

Multilingual voice gives every scenario a real, natural voice.

Supabase

PostgreSQL, auth and storage with row-level security baked in.

Vercel + Render

Modern, auto-scaling hosting with a global CDN and zero-downtime deploys.

React · TypeScript · Node.js · Tailwind — a modern stack your IT team will recognise.

GETTING STARTED

Up and running in three simple steps

1

Onboard your property

We set up your organisation, departments and staff list — typically same week.

2

Staff start training

Teams log in and begin drilling the scenarios that matter for their roles.

3

Track & improve

Managers watch scores climb and target coaching where it's needed.

Let's make your team guest-ready.

Book a walkthrough and we'll set up a live scenario for your property — you'll see exactly how your staff would train.
